EXPERIENCE

Huawei

Cloud & DevOps Engineer

Jul 2025 – Present

- Operated Huawei Cloud/Cloud Stack infrastructure and server environments.
- Managed VPC networking, NAT, ELB, and Auto Scaling services.
- Managed Huawei Cloud services including ECS, RDS, EVS, SFS, and OBS.
- Designed containerized workloads with CCE and CCI.
- Implemented CI/CD pipelines with CodeArts, Docker, Kubernetes, and SWR.

Huawei

Frontend Developer

Feb 2024 – Jul 2025

- Developed a geolocation app used by hundreds of companies in the Middle East KooMap with Angular, RxJS, Observables, and RESTful API integrations.
- Built the Database-Helper extension An application used to connect databases for use in the CodeArts IDE using Vue 3, TypeScript, Vuex, and vue-i18n.
- Delivered migration and feature-development work for the EBG project using the xtpl framework.
- Produced technical documentation and reusable architectural guidance for RxJS and Observable-based application structures.

Galileo Healthcare Technologies

Frontend Developer

Jan 2022 – Feb 2024

- Developed used by hundreds of people HBYS healthcare applications with Angular, TypeScript, reactive forms, RxJS, Sass, Tailwind CSS, and Angular lifecycle hooks.
- Contributed to Wound Procedure and Nuclear Medicine Clinical systems, including reusable UI components and API-driven workflows.
- Worked on backend services and database integrations using Spring Boot, Spring MVC, Spring Data, NestJS, Java, PostgreSQL, and MySQL.
- Supported DevOps processes by managing automated test, build, and deployment stages through CI/CD pipelines.

Turkish Electricity Distribution Corporation

Engineer Intern

Aug 2020 – Sep 2020

- Researched engineering workflows and contributed to a project developed with .NET MVC.

YCP Information Technologies

R&D Intern

Jul 2018 – Aug 2018

- Developed .NET MVC functionality using C# and Visual Studio.

EDUCATION

Çankaya University

B.Sc. in Computer Engineering

2021

Centre of English Studies

English Language Program

2015

PROJECTS

Huawei CodeArts CI/CD Pipeline

- Built thanks to automation, CI/CD processes have accelerated build processes a complete pipeline for a Vue.js application using CodeHub source control, Docker image build, Nginx serving layer, Kubernetes deployment on CCE, and image publishing to SWR.

Cloud-Native E-commerce Architecture

- Designed CCE-based long-running services and CCI-based event-driven workloads supported by Huawei Cloud networking, database, and storage services.

TECHNICAL SKILLS

Cloud & DevOps: Huawei Cloud, Huawei Cloud Stack, CCE, CCI, ECS, ELB, RDS, EVS, SFS, OBS, SWR, CodeArts, Docker, Kubernetes, Terraform, Jenkins, GitLab CI, GitHub Actions, Linux, Ubuntu

Networking: VPC, Subnetting, VPC Peering, Route Tables, Security Groups, NAT Gateway, DNAT, SNAT, Load Balancing

Frontend: Angular, Vue.js 2/3, React, TypeScript, JavaScript, RxJS, Vuex, Redux, Sass, Bootstrap, Material, Tailwind CSS, Figma

Backend & Data: Java, Spring Boot, Spring MVC, Spring Data, Node.js, Express.js, NestJS, Firebase, PostgreSQL, MySQL

Tools & Practices: Git, Bitbucket, Jira, Agile/Scrum, REST APIs, CI/CD, Infrastructure as Code, Object-Oriented Programming
