EXPERIENCE

Huawei

Software Engineer / Cloud & DevOps Engineer

Feb 2024 – Present

- Built and maintained Huawei Cloud & Cloud Stack infrastructure, including ECS, RDS, EVS, SFS, OBS, and networking services.
- Designed containerized workloads with Kubernetes (CCE/CCI), Docker, and Nginx.
- Implemented CI/CD pipelines using Huawei CodeArts, CodeHub, Docker, Kubernetes, and SWR.
- Automated infrastructure provisioning and service deployments on Huawei Cloud using Terraform, implementing Infrastructure as Code (IaC) practices.
- Integrated Terraform workflows into GitLab CI/CD pipelines to automate infrastructure and application service deployments on Huawei Cloud.
- Developed a geolocation app used by hundreds of companies in the Middle East KooMap with Angular, RxJS, Observables, and RESTful API integrations.
- Built the Database-Helper extension An application used to connect databases for use in the CodeArts IDE using Vue 3, TypeScript, Vuex, and vue-i18n.
- Produced technical documentation and reusable development guidelines for frontend and cloud solutions.

Galileo Healthcare Technologies

Frontend Developer

Jan 2022 – Feb 2024

- Developed used by hundreds of people HBYS healthcare applications with Angular, TypeScript, reactive forms, RxJS, Sass, Tailwind CSS, and Angular lifecycle hooks.
- Contributed to Wound Procedure and Nuclear Medicine Clinical systems, including reusable UI components and API-driven workflows.
- Worked on backend services and database integrations using Spring Boot, Spring MVC, Spring Data, NestJS, Java, PostgreSQL, and MySQL.
- Supported DevOps processes by managing automated test, build, and deployment stages through CI/CD pipelines.

Turkish Electricity Distribution Corporation

Software Intern

Aug 2020 – Sep 2020

- Researched engineering workflows and contributed to a project developed with .NET MVC.

YCP Information Technologies

Software Intern

Jul 2018 – Aug 2018

- Developed .NET MVC functionality using C# and Visual Studio.

EDUCATION

Çankaya University

B.Sc. in Computer Engineering

2021

Centre of English Studies

English Language Program

2015

PROJECTS

Huawei Cloud – Terraform & GitLab CI/CD Automation

- Automated infrastructure provisioning and service deployments on Huawei Cloud using Terraform and Infrastructure as Code (IaC) practices.
Integrated Terraform workflows with GitLab CI/CD pipelines to automate infrastructure and application service deployments.
Improved deployment consistency and reduced manual infrastructure configuration through reusable Terraform configurations and automated pipelines.

Huawei CodeArts – Kubernetes CI/CD Pipeline

- Built an end-to-end CI/CD pipeline for a Vue.js application using Huawei CodeArts and CodeHub.
Automated application build, Docker image creation, image publishing to SWR, and Kubernetes deployment on Huawei Cloud CCE.
Deployed the application using Kubernetes Deployments and Services, with Nginx serving the frontend application.
Integrated automated testing into the pipeline to identify application and deployment issues before production releases.

Cloud-Native E-Commerce Architecture

- Designed a cloud-native e-commerce architecture on Huawei Cloud using CCE for long-running frontend and backend services and CCI for event-driven workloads.
Integrated Huawei Cloud networking, database, and storage services including VPC, ELB, RDS, SFS, OBS, and SWR.
Designed scalable application components using Kubernetes, containerization, load balancing, and cloud-native infrastructure services.

TECHNICAL SKILLS

Cloud Infrastructure: Huawei Cloud, Huawei Cloud Stack, ECS, CCE, CCI, RDS, EVS, SFS, OBS, SWR

Containers Orchestration: Kubernetes, Docker, CCE, CCI, Nginx

Infrastructure as Code Automation: Terraform, Infrastructure as Code (IaC)

Networking: VPC, Subnetting, VPC Peering, Route Tables, Security Groups, NAT Gateway, SNAT, DNAT, ELB, Load Balancing

Operating Systems: Linux, Ubuntu

CI/CD Version Control: GitLab CI/CD, Huawei CodeArts, CodeHub, Jenkins, GitHub Actions, Git, Bitbucket

Backend Databases: Java, Spring Boot, Spring MVC, Spring Data, Node.js, NestJS, PostgreSQL, MySQL

Frontend: Angular, Vue.js 2/3, React, TypeScript, JavaScript, RxJS, Vuex, Redux, Sass, Tailwind CSS

Tools Practices: REST APIs, Agile/Scrum, Jira, CI/CD, Infrastructure as Code, Cloud Infrastructure, Kubernetes Troubleshooting
